

Worldspan[®] Reward Shopping

Getting Started With Reward Shopping from Worldspan by Travelport Is Easy

Worldspan Reward Shopping is based on proven technology that combines the power and reach of Worldspan e-Pricing[®] with ATPCO fares.

Here Is How It Works:

Worldspan e-Pricing technology searches to find flights with available reward inventory and then displays prices for these flights as mileage amounts rather than fares.

Simply file new ATPCO fares (Category 25) defined for your specific reward classes as mileage amounts. You can adjust mileage levels, just like fares, to support inventory and market differentiation. Getting started is that fast.

Reward Shopping easily includes your designated airline award partners. Additionally, availability may be tailored based on your program and the traveler's frequent flyer status.

Worldspan Reward Shopping delivers the same popular shopping experience for reward travel as for revenue travel. Automating reward travel with a full month view of available travel dates makes booking free tickets easier and improves your customer's experience.

Best of all, Worldspan Reward Shopping's messaging structure is a perfect fit for your airline Web site.

Contact your Travelport Account Manager for more details.

Are your reward frequent travelers frustrated with trying to redeem free travel?

Are your customers calling reservations and checking for available reward seats?

Do you want to give the control to consumers to quickly and easily locate and book reward seats?

If the answer is yes to even one of these questions, explore using Worldspan Reward Shopping.
